

## DTF TRANSFER FILM. Manufactured by B-Flex for DTF printers.

Thanks to our experience and production capacity in the heat transfer vinyl world, we have developed our DTF transfer film.

The film is produced in Italy and responds to main market requirements, application range from 130°C / 265°F to 160°C / 320°F, hot peel, brilliant and vivid colors, and top performance on small details.

What makes DTF B-Flex film so unique and special?

### QUALITY OVER TIME:

the films features remain unchanged so you can count on the same premium quality over time;

### APPLICATION FROM 130°C / 265°F:

to be able to customize many different fabrics and delicate materials;

### HOT PEEL:

liner removal after few seconds;

### BRILLIANT AND VIVID COLORS:

excellent color rendering for intensity and depth;

### SOFT TOUCH EFFECT:

smooth and soft results on the application due to a specific chemical formula of the film;

### MAXIMUM PERFORMANCE ON SMALL DETAILS:

perfect peel avoiding dragging details.

DTF transfer film by B-Flex is produced in Italy, guaranteeing quality and consistency combined with the innovation and care that have always distinguished Made In Italy products.
