About Us *We produce for earth*

Bilsan Flag is a turkish company specialising in the production and in the selling of flag items since 2010, in Istanbul. We have become one of the leading companies of the sector in a very short time.

Discover all the products offered to your needs : Bilsan Flag produces country flags, advertising flags, personalised flags and other flag materials that you will need.

As producers, we give a huge importance to the quality of our work. This is why we are using first quality materials in order to satisfy our customers requests.

Our company is constantly in progress : the contribution of new high performance machines and our sales team allow us to meet all expectations and create an exceptional relationship with our customers.

About Us *We produce for earth*

HIGH QUALITY PRINT

Bilsan Quality

5000m²

DAILY CAPACITY OF PRODUCTION

1

The digital printing is executed thanks to our new high performance machines, which capacity of production is 5000m².

2

After printing, the fabric rolls go through the heat machine to fix the colors and make them more vibrant. Thus, this allows better resistance to weather conditions.

3

According to the desired sizes, the hot cutting technique is used and the edges are strengthened with stitches.

4

Our flags are prepared meticulously and the highest quality possible workmanship is applied thanks to our employees who are specialized and experienced in this sector.

5

Your orders are carefully packaged and delivered on time. The order's each stage is reported to you by our clients representative.

100% POLYESTER FLAG MADE OF PET BOTTLES

With a 10.000 sqm flag production, we clean 110.000 pet bottles from nature.

1) Recycled pet bottles

2) Pet bottles shards are used as raw materials

3) Shards are turned into polymer chips

4) Production of recycled polyester thread

5) Thanks to the recycled thread, we obtain a polyester fabric

Finally, the 100% recycled flag is produced, while respecting our planet.

Our flag are produced with a 100% recycled polyester fabric.

The advantages of a recycled flag :

1. It saves more energy.
2. It helps to reduce greenhouse gas emissions.
3. The use of plastic bottles as raw materials reduce the level of the environmental pollution.
